NOTES TO THE INTERIM FINANCIAL STATEMENTS AS OF MARCH 31, 2024

NOTE 1 - BBTS AND ITS OPERATIONS

BB Tecnologia e Serviços S.A. ("BBTS" or "Company"), registered with CNPJ (MF) under No. 42.318.949/0013-18, is a company controlled by Banco do Brasil S.A. (BB), which holds 99.97% of its capital. It provides services in the Information Technology and Business Process segments, with Banco do Brasil S.A. as its main client. Its head office is located at Setor de Edifícios Públicos Norte, quadra 508, conjunto "C", lote 07, Brasília, Federal District.

BBTS has a broad and diversified Business Portfolio, with technology products (*Information Technology Outsourcing - ITO*) and services (*Business Process Outsourcing - BPO*). This diversification of the portfolio provides business diversity, synergy gains through the possibility of solutions with a combination of products and services, with benefits for business sustainability and the generation of internal operational efficiency and for the clients served.

Infrastructure and Availability: we offer a large network of specialized technical assistance throughout the country to guarantee the operational availability of banking automation equipment, with corrective, preventive and predictive maintenance, using environment and equipment monitoring services.

Security Management: BBTS offers specialized security solutions for environments, generating value through the integration of devices and greater efficiency and assertiveness in dealing with events.

Communication and Connectivity: regardless of the size of the organization or the segment, telephony and connectivity solutions are indispensable tools for optimizing management and guaranteeing other benefits.

Channels and BackOffice: the Channels and *BackOffice* business line aims to generate process intelligence, increase efficiency and gain scale for customers by centralizing customer relationship services and handling documents with sensitive data.

Digital Products and Solutions: through solutions built in-house and/or developed and marketed with partners, BBTS' digital solutions offer reliable technologies to boost organizations' digital transformation.

Correspondent Banking: BBTS will be responsible for marketing products directly or means of sub-substitution to other companies forming a network of correspondents, acting as Network Manager.

It is through the diversity and complementarity of its Business Portfolio, and the capillarity and specialization of its operating units, that BBTS is able to deliver operational efficiency in the provision of services to clients with excellence, as well as guaranteeing the sustainability of results and business.

The figure below summarizes the BBTS Portfolio, with its Business Lines and respective types of products and services:

NOTE 2 - PRESENTATION OF INTERIM FINANCIAL STATEMENTS

a) Declaration of conformity

The interim financial statements were prepared based on the accounting guidelines issued by the Brazilian Corporation Law and are presented in accordance with Technical Pronouncement CPC 21 (R1) - Interim Financial Statements, approved by the Federal Accounting Council (CFC).

All relevant information specific to the financial statements, and only information, is being disclosed, and corresponds to that used by the Board of Directors in its management.

These interim financial statements were approved and authorized by the Executive Board on May 14, 2024 and by the Board of Directors on May 27, 2024.

b) Functional and presentation currency

The financial statements are presented in Reais, which is BBTS's functional and presentation currency. This currency defined using the criteria set out in items 9 to 14 of Technical Pronouncement CPC 02 (R2) - Effects of Changes in Foreign Exchange Rates and Translation of Statements.

All accounting information presented in thousands of reais (R\$ thousand) has been rounded to the nearest thousand, unless otherwise indicated.

Amounts expressed in thousands of Reais, except where indicated.

c) Continuity

Management has assessed BBTS's ability to continue operating normally and is convinced that it has the resources to continue its business in the future. In addition, management is not aware of any material uncertainty that may cast significant doubt on its ability to continue as a going concern. Accordingly, these statements have been prepared on a concern basis.

d) Changes in accounting policies

The accounting policies and methods used in the preparation of these financial statements are equivalent to those applied to the financial statements for the year ended 31.12.2023.

e) Recently issued standards and pronouncements Standards applicable from 01.01.2024

Revision of technical pronouncements No. 23/2023

In August 2023, the Accounting Pronouncements Committee made changes to the following Technical Pronouncements: CPC 26 (R1) Presentation of Financial Statements and CPC 06 (R2) - Leases.

The revision establishes changes in Technical Pronouncements due to changes in the classification of liabilities as current or non-current; non-current liabilities with covenants and lease liabilities in a sale and leaseback transaction.

BBTS assessed the impacts of the revision of the pronouncements and did not identify any significant effects.

Revision of technical pronouncements No. 24/2023

In December 2023, the Accounting Pronouncements Committee made changes to the following Technical Pronouncements: CPC 03 (R2), CPC 32, CPC 40 (R1).

The revision establishes changes to Technical Pronouncements as a result of changes to the International Tax Reform - Pillar Two Model Rules and Supplier Financing Arrangements. BBTS assessed the impacts of the revision of the pronouncements and did not identify any significant effects.

NOTE 3 - MATERIAL ACCOUNTING POLICIES

The accounting policies adopted by BBTS are applied consistently in all periods presented in the financial statements.

a) Recognition of Income and Expenses

In accordance with the accrual basis, income and expenses are recognized in the income statement for the period to which they belong and, when they correlate, simultaneously, regardless of receipt or payment. Transactions with post-fixed financial charges are restated on a pro rata die basis, based on the variation in the respective agreed indexes, and transactions with pre-fixed financial charges are recorded at the redemption value, rectified in the account of income to be appropriated or expenses to be appropriated corresponding to the future period.

a.1) Revenue from Services Rendered (Clients)

In accordance with CPC 47 (IFRS 15) - Revenue from Contracts with Customers, revenue from services rendered is recognized on a monthly accrual basis, provided that its value, the associated costs and the stage of completion of the transaction can be measured reliably and it is probable that the economic benefits associated with the transaction will be realized.

Amounts expressed in thousands of Reais, except where indicated.

According to CPC 47, revenue recognition occurs when the performance obligations specified in the contract are met, reflecting the stage of execution. This means that revenue recognition is not based on the fulfillment of specific criteria, but rather on the progress of performance obligations over time. The steps for recognizing revenue include: (I) identifying the contract with the client; (II) identifying the performance obligations in the contract; (III) determining the transaction price; (IV) allocating the transaction price to the performance obligations; and (V) recognizing revenue as performance obligations are met.

Revenues from services rendered are recognized when the entity satisfies the performance obligation by transferring the promised good or service to the customer. These revenues come from various segments, such as infrastructure and availability, security management, connection and connectivity, channels and BackOffice, digital products and solutions, and correspondent banking. They can be recognized over time, when the products have a defined term, and the performance obligation is diluted linearly over the term of the business, or at specific times, such as monthly products, where the performance obligation is met monthly, depending on the characteristics of the products.

a.2) Financial income and expenses

Financial income and expenses from financial instruments arising from assets and liabilities that earn and pay monetary restatement and/or interest, as well as the amounts relating to the restatement at fair value, are recognized in the income statement for the period on an accrual basis, using the effective interest rate method, in accordance with CPC 48 (IFRS 9) - Financial Instruments.

b) Cash and cash equivalents

Cash and cash equivalents are represented by cash and cash equivalents in local currency with high liquidity and insignificant risk of change in value, maturing in 90 days or less.

They include cash balances, current accounts (bank demand deposits) and short-term investments (short-term investments) considered to be immediately liquid or convertible at any time into a known amount of cash and which are subject to an insignificant risk of change in value.

In order to remunerate its availability, the company must allocate its resources to off-market funds, referenced to the DI rate - interbank deposit (in accordance with Decree-Law 1290/73 and CMN Resolutions 4.986/22 and 4.034/11), notably low-risk and with daily liquidity, which can be traded for set periods in return for increase in their profitability. These assets have no restrictions on their use and have not been pledged as collateral for any transaction.

c) Taxes

Taxes are calculated according to the calculation bases and rates shown in the table below:

Taxes	Calculation Basis	Rates
Corporate Income Tax - IRPJ (15%+ Additional 10%)	Real Profit	25%
Social Contribution on Net Profit - CSLL	Real Profit	9%
Contribution to Social Security Financing - COFINS	Billing	3% e 7,6%
PIS/PASEP	Billing	0,65% e 1,65%
Tax on Operations Relating to the Circulation of Goods and Services-ICMS	Value of the Circulation Operation	up to 20%
	Goods/Services	
Tax on Services of Any Kind - ISSQN	Value of Service Provided	up to 5%

The offsetting of tax losses and negative social contribution bases is limited to 30% of actual profit.

Deferred tax assets (tax credits) and deferred tax liabilities are recognized by applying the tax rates in force to their respective bases. For the constitution, maintenance and write-off of assets

Amounts expressed in thousands of Reais, except where indicated.

deferred taxes, the criteria established by Technical Procedure CPC 32 - Income Taxes are observed.

d) Prepaid expenses

These correspond to the application of funds in advance payments, which are being appropriated on an accrual basis, based on the term of insurance policies, service or financing contracts.

e) Non Derivative Financial Assets

The Company initially recognizes loans, receivables and deposits on the date they are originated. All other financial assets are initially recognized on the date of the negotiation in which the Company becomes one of the parties to the contractual provisions of the instrument.

The Company derecognizes a financial asset when the contractual rights to the asset's cash flows expire, or when it transfers the rights to receive the contractual cash flows on a financial asset in a transaction in which essentially all the risks and rewards of ownership of the financial asset are transferred. Any interest created or retained by the Company in financial assets is recognized as an individual asset or liability.

Financial assets or liabilities are offset and the net amount presented in the balance sheet only when the Company has the legal right to offset the amounts and intends to settle on a net basis or to realize the asset and settle the liability simultaneously.

The Company has the following non-derivative financial assets:

Loans and Receivables: these are financial assets with fixed or calculable payments that are not quoted in the active market. These assets are initially recognized at fair value plus any attributable transaction costs. After initial recognition, loans and receivables are measured at amortized cost using the effective interest method, less any losses. Loans and receivables include cash and cash equivalents, customers and other current assets.

Financial assets measured at fair value through profit or loss: a financial asset is classified as measured at fair value through profit or loss if it is classified as held for trading, i.e. designated as such upon initial recognition. Financial assets are designated at fair value through profit or loss if the Company manages such investments and makes purchase and sale decisions based on their fair values in accordance with the risk management and investment strategies documented by the Company. Transaction costs are recognized in profit or loss as incurred. Financial assets are measured at fair value and changes in these assets are recognized in profit or loss for the period.

f) Non Derivative Financial Liabilities

All financial liabilities are initially recognized on the trade date on which BBTS becomes a party to the contractual provisions of the instrument. The Company writes off a financial liability when its contractual obligations are settled, withdrawn or canceled.

Such financial liabilities are initially recognized at fair value plus any attributable transaction costs. After initial recognition, these financial liabilities are measured at amortized cost using the effective interest method.

g) Fixed Assets

The policy for recognizing, measuring and depreciating property, plant and equipment was constructed by the company based on the guidelines of Technical Pronouncement CPC 27 - Property, Plant and Equipment.

Amounts expressed in thousands of Reais, except where indicated.

Recognition and Measurement: items are measured at historical acquisition or construction cost, which includes all expenses directly attributable to the acquisition of the asset, less accumulated depreciation and, where applicable, accumulated impairment losses.

When parts of an asset item have different useful lives, they are recorded as individual items (main components) of the asset.

Gains and losses on the disposal of an item of property, plant and equipment are calculated by comparing the proceeds from the disposal with the carrying amount of the property, plant and equipment and are recognized net within other income in profit or loss.

Depreciation: depreciation is recognized in the income statement using the straight-line method and according to the estimated useful life of each part of an item of property, plant and equipment. This method most closely reflects the pattern of consumption of future economic benefits embodied in the asset.

Depreciation methods, useful lives and residual values are reviewed at each financial year end and any adjustments are recognized as changes in accounting estimates.

h) Impairment

Financial assets (including receivables): financial assets that are not measured at fair value through profit or loss are assessed at each reporting date to determine whether there is evidence of impairment, in accordance with the requirements of CPC 48 - Financial Instruments.

In accordance with CPC 48, the Company must assess the expected credit loss associated with these assets. This assessment must consider the possibility of loss events that may occur over the life of the financial assets, starting from initial recognition. The impairment loss is recognized based on an estimate of expected credit losses, which considers all available events and information that may impact future cash flows.

BBTS assessed and did not identify any applicable impacts for financial assets.

Non-Financial Assets: the book values of the Company's non-financial assets are evaluated each year in accordance with Technical Pronouncement CPC 01(R1) of 2010, of the Accounting Pronouncements Committee, which states that the entity must assess whether there is any indication that an asset may have suffered impairment, a situation that would make it necessary to estimate the asset's recoverable value. If there is an indication impairment, BBTS estimates the asset's recoverable amount, which should be the greater : I) its fair value less costs to sell it; and II) its value in use. If the asset's recoverable amount is lower than its book value, it is reduced to its recoverable amount by recording an impairment loss, recognized in the income statement for the period.

BBTS assessed the impacts of the revision of the pronouncements and did not identify any significant effects.

BBTS is not impacted by CPC 48

i) Renting

BBTS has assessed whether a contract is or contains a lease and recognizes a right-of-use asset and corresponding lease liability with respect to all lease contracts in which the company is the lessee.

The liability is initially measured at the present value of the lease payments that have not been paid at the commencement date, discounted using the implicit lease rate. If this rate cannot be readily identified, BBTS uses the incremental funding rate. The discount rate is the interest rate that the lessee would have to pay when borrowing, for a similar term and guarantee, the funds necessary to obtain the asset

Amounts expressed in thousands of Reais, except where indicated.

with a similar value to the right-of-use asset in a similar economic environment. The average discount rate used by BBTS was 9.33% p.a.

The lease liability is subsequently measured by increasing the carrying amount to reflect the interest on the lease liability and reducing the carrying amount to reflect the lease payment made. Right-of-use assets include the initial measurement of the corresponding lease liability and payments made on or before the acquisition date, less any lease incentives received and any initial direct costs. These assets are subsequently measured at cost, less accumulated depreciation and impairment losses (if applicable). Right-of-use assets are depreciated over the lease period and the corresponding useful life of the asset, whichever is the shorter.

The right to use the leased property is recognized in the balance sheet as property, plant and equipment - right-of-use assets and the amount to be disbursed in respect of the lease installments is included in other obligations - lease.

As a result of this assessment, BBTS identified 44 lease contracts for the rental of furniture or real estate used in its operations.

NOTE 4 - MAIN ACCOUNTING JUDGMENTS AND ESTIMATES

The criteria and assumptions used to make estimates and judgments are regularly reviewed and their validity reassessed at least during the preparation of the interim financial statements. The preparation of these statements requires management to use judgments, accounting estimates and assumptions, which influence the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Assets and liabilities of significant importance subject to these estimates and assumptions include the residual value of fixed assets, provisions for expected credit losses, inventory obsolescence and provisions for labor, tax and civil contingencies. The definitive values of the transactions related to these estimates are only known when they actually occur.

Estimates and assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

Information on uncertainties, assumptions and estimates that have a significant risk of resulting in a material adjustment within the next financial year is included in the following Notes: Note 6 - Customers; Note 7 - Inventories; Note 11 - Income Tax and Social Contribution; Note 15 - Property, Plant and Equipment; Note 16 - Intangible Assets; Note 23 - Provisions and Contingent Liabilities and Note 29 - Expenses for Provisions for Contingencies and for Credit Losses.

NOTE 5 - CASH AND CASH EQUIVALENTS

Description	31.03.2024	31.12.2023
Current Account Banks	10.506	46.373
Applications	269.116	215.378
Total	279.622	261.751

In order to remunerate its resources, the company allocates its capital to off-market funds, referenced to the DI (interbank deposit) rate. These funds are notably low-risk, have daily liquidity and can be traded for fixed periods. This strategy aims to significantly increase the profitability of the funds. It is worth noting that these assets have no restrictions on use and have not been offered as collateral for any operation.

NOTE 6 - CLIENTS

Description	31.03.2024	31.12.2023
	Current	Current

Amounts expressed in thousands of Reais, except where indicated.

Accounts Receivable	9.804	6.857
Accounts Receivable by Settlement	118.299	93.522
Provisions for Credit Losses	(2.001)	(2.001)
Total	126.102	98.378

Accounts receivable from clients are recorded at the value of the measurements made at the end of each month, including the respective taxes. Receivables from services rendered are settled in the short term, on average within 30 days. Due to this timeframe, the calculations of adjustments to present value did not show significant amounts, which is why no adjustments to present value were recorded.

The client portfolio is concentrated in the financial segment, with a high level of participation by the controlling shareholder Banco do Brasil S.A. and companies in its conglomerate.

Days Late	31.03.2024	31.12.2023
0 - 30 days	7.803	4.856
61 - 90 days	-	6
91 - 180 days	6	-
181 - 360 days	1	1
Over 360 days	1.994	1.994
Total	9.804	6.857

NOTE 7 - INVENTORIES

Description	31.03.2024	31.12.2023
Maintenance	63.337	59.566
Parts in Repair ^[1]	(29.284)	(27.300)
Reception / Dispatch	3.804	3.691
Proof for Obsolescence	(173)	(173)
Proof of Inventory Losses	(38)	-
Total	37.646	35.784

^[1]This amount refers to the recognition of defective parts, which are under repair and make up the inventory, according to the new inventory measurement methodology, approved by the executive board.

Inventories are stated at the lower of cost and net realizable value, as determined by Technical Pronouncement CPC 16 (R1) - Inventories. Inventory costs were determined using the average cost method net of recoverable taxes.

Inventories are represented by consumables and spare parts for self-service machines, which BBTS must keep in stock for service, replacement and immediate maintenance and are provided for in the technical assistance contracts with its client Banco do Brasil S.A.

If the characteristics of obsolescence or deterioration are found, i.e. its loss of future usability, the item must be written off and an expense recognized in the income statement for the period in which the occurs. If the physical write-off does not occur at the time of finding, a provision for loss must be set up to control items considered obsolete and await their effective write-off by sale or disposal, but the loss must be recorded in the income statement via a provision.

NOTE 8 - TAXES RECOVERABLE

COFINS	1.205	8.758	-	12.370
Total	15.211	71.843	55.762	25.194

Banco do Brasil S.A. withholds federal taxes from BBTS in accordance with Law 10.833/2003, which establishes that mixed-capital companies directly controlled by the Federal Government must compulsorily withhold federal taxes at source (IRPJ, CSLL, PASEP and COFINS) from their payments to suppliers. The right to offset these taxes depends on the company's actions with the Brazilian Federal Revenue Service (RFB) and the agency's approval of the offset, but there is no history of disapproval when the request is made.

BBTS uses the taxes to be recovered/compensated to mitigate the amount of taxes to be paid, which results in more efficient management of its cash flow.

Since 2006, there have been several administrative proceedings before the Brazilian Federal Revenue Service (RFB) requesting refunds of amounts due to withholdings in excess of the taxes actually owed, and some are pending judgment by the Administrative Council for Tax Appeals (CARF).

Due to the fact that some requests for refunds of negative balance of IRPJ and CSLL made to the RFB (Brazilian Federal Revenue Service) were denied and due to the progress of the proceedings before the CARF (Administrative Council for Tax Appeals), the company set up a provision for losses of these amounts in the amount of R\$3.7 million (non-current).

INSS - The Company also has INSS withheld at source on some types of services provided using labor and these amounts recorded in current liabilities are being offset against the INSS.

ISS - The credits correspond to withholding tax levied by clients. The amounts are provisioned since these credits are pending approval by the tax authority for offsetting purposes.

ICMS - The credits correspond to the credit balances recorded in the ICMS calculation books of the BBTS establishments that circulate parts.

PASEP/COFINS - Until June 2017, BBTS calculated its federal PASEP/COFINS taxes under the non-cumulative regime, using the rates of 1.65% and 7.6% on turnover, respectively, deducting the credits provided for in the tax legislation from the costs used in providing services. After a study, it was identified that certain revenues should be subject to the cumulative regime, with PASEP/COFINS rates of 0.65% and 3%, respectively.

In order to carry out the retroactive calculation, BBTS hired a company specializing in the accounting-tax area. This company identified an amount of R\$9.6 million (non-current) that had been recorded in April 2018. However, due to the loss of the statute of limitations for 2014, this amount was reduced by R\$900,000 in 2020.

In 2023, the amount was adjusted by the monthly Selic rate, resulting in a total of R\$15 million (non-current). In the first quarter of 2024, this amount was again adjusted by the monthly Selic rate and had the difference from the rectification of the accessory obligation (EFD Contribuições) subtracted. The resulting balance totals R\$10.7 million in non-current assets.

NOTE 9 - ANTICIPATED COSTS AND EXPENSES

Other provisions	6.495	2.156	8.651
Total Activated	65.880	(2.230)	63.650

Expected Realization: the expected realization of deferred tax assets (tax credits) is based on a technical study prepared in December 2023, values of which are shown in the table below, with the present value calculated based on the Central Bank of Brazil's average over-Selic rate. A new study will be carried out at the close of the 2024 financial statements:

Year	Nominal consumption	Consumption Present Value
Dec/24	7.501	6.865
Dec/25	8.317	7.001
Dec/26	8.976	6.956
Dec/27	9.558	6.815
Dec/28	10.074	6.610
Dec/29	10.528	6.356
Dec/30	10.926	6.070
Total	65.880	46.672

Amounts expressed in thousands of Reais, except where indicated.

During the first quarter of 2024, BBTS recorded a realization of tax credits. This amount corresponds to the difference between the constitution of these credits and their write-off, totaling R\$2.2 million.

NOTE 12 - CREDITS AND OTHER AMOUNTS

These correspond to guarantees given to customers and suppliers to guarantee the provision of services and rental of real estate. The guarantees are updated monthly, based on the indices presented in the contracts, and match the bank positions that are thus constituted:

Description	31.03.2024	31.12.2023
	Non-current	Non-current
Bonds:	348	2.930
Clients:	222	2.806
Bank of Brazil	96	2.681

Bank of Brazil	44.872	39.234
Total	45.220	42.164

NOTE 13 - JUDICIAL DEPOSITS

The balance of judicial deposits pledged as collateral for probable, possible or remote contingent liabilities is as follows:

Description	31.03.2024	31.12.2023
	Non-current	Non-current
Labor	25.499	25.583
Civil	2.199	2.162
Tax	298	305
Total	27.996	28.050

The balances are checked against the monthly positions provided by Caixa Econômica Federal and Banco do Brasil S.A., which are updated according to the positions recorded by the depositary financial institutions. The amount recorded corresponds to the recoverable value.

NOTE 14 - JUDICIAL CREDITS RECEIVABLE

The balance of judicial credits receivable in 2023 refers to court-ordered payment warrants, where the Federal Government (IBGE) is the debtor, according to a court decision favorable to BBTS in case no. 0014472-47.1994.4.02.5101.

BBTS recalculated the amounts, taking into account the return date set in 2020. In the ruling, it was determined that the calculation would go back to the base date of December 2002. As a result, the amount came to R\$13.2 million, which was collected in March 2024.

Description	31.03.2024	31.12.2023

Total	-	12.390	561	(902)	44.878	(32.829)	12.049

In accordance with Technical Procedure CPC 04 (R1) - Intangible Assets, the assets classified under intangible assets refer to the acquisition of rights to use *software* which, despite not having physical substance, contribute to generating economic benefits for the company.

Based on item 57 of Technical Procedure CPC 04 (R1), BBTS recognizes in its assets software that has been developed and that is under development, the purpose of which is to meet internal demand. Intangible assets that have been acquired and developed internally are subject to amortization, the rate of which is consistent with the useful economic life of the assets. Software under development is not amortized.

NOTE 17 - SUPPLIERS

NOTE 19 - LOANS

Loans are initially recognized at fair value, net of transaction costs, and stated at amortized cost, i.e. plus charges and interest proportional to the period incurred.

They are classified as current liabilities, unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

In April 2021, it was decided to raise funds for the closure of the arbitration process involving Banco da Amazônia S.A., with a total debt of R\$217.6 million, of which R\$68.9 million were own funds and R\$148.7 million were long-term loans (5 years) raised from Banco do Brasil S.A. in April 2021 at a monthly cost of CDI + 2.10% p.a. and semi-annual amortization of R\$7.5 million.

Description	31.03.2024		31.12.2023

Loans	15.307	89.100	15.364	96.550
Total	15.307	89.100	15.364	96.550

In the event of non-compliance with any legal or conventional obligation, or in the event of early maturity of the operation, as from the default and on the defaulted amount, the following will be demanded, under the terms of Resolution No. 4,882/20: financial charges contracted for the period of default of the operation, default interest of 1%

a.m. on the defaulted amount and a fine of 2% calculated and demanded on partial payments, on amortized amounts and on final settlement.

As provided for in the special early maturity clause of the loan agreement, without prejudice to other causes of early maturity of the obligation, the bank may consider the credit operation overdue and demand its immediate settlement if, during its term and without the bank's express agreement: direct and/or indirect control of its capital is transferred; there is a change in the ownership of its share capital; there is a change in the share capital of any of its subsidiaries that results in the loss of its corporate control. The company is in compliance with the special early maturity clause of the agreement.

	Current	Current
Salaries and Benefits Payable	2.210	1.925
Total	2.210	1.925

B BTS pays salaries on time, and the remaining balance refers to the registration of assigned employees, who are paid by the 5th working day of the following month.

Amounts expressed in thousands of Reais, except where indicated.

Monthly remuneration paid to employees and management (in Reais):

Remuneration of Employees and Managers	31.03.2024	31.12.2023
Employees		
Lowest salary	1.497,99	1.400,39
Highest salary	32.969,35	32.969,35
Average salary	5.343,64	5.269,47
Administrators		
President	56.873,42	56.873,42
Director	47.139,06	47.139,06
Board members		
Board of Directors	5.370,38	5.370,38
Supervisory Board	5.370,38	5.370,38
Audit Committee	5.370,38	5.370,38

As established in BBTS's Bylaws, in Article 11, item V, the overall remuneration of directors is set annually by the Annual General Meeting (AGM).

The remuneration characteristics of each BBTS body are described below:

Board of Executive Officers: to remunerate the members of the Board of Executive Officers (DIREX) taking into account their responsibilities, the time dedicated to their duties, their skills and professional reputation and the value of their services in the market, in order to maximize the Company's results in a sustainable manner over time.

Board of Directors (CONAD), Supervisory Board (COFIS) and Audit Committee (COAUD): for the members of the boards, the amount practiced corresponds to 10% (ten percent) of the weighted average of the amounts paid to the members of the Executive Board (DIREX), the aim being to remunerate them for the services rendered.

NOTE 21 - PERSONNEL PROVISIONS

Description	31.03.2024	31.12.2023
	Current	Current
Vacation provision	30.287	30.637
Provision for 13th salary	5.066	-

Provision for Premium Leave	2.112	2.053
Provision for Supplementary Pensions	1.174	984
Total	51.127	40.101

NOTE 22 - PROVISIONS FOR TAXES AND CONTRIBUTIONS

Description	31.03.2024	31.12.2023
	Current	Current
IRPJ	3.138	3.090
CSLL	1.129	1.113
Total	4.267	4.203

The provision was set up based on the incidence of Income Tax (IRPJ) and Social Contribution (CSLL) on federal PASEP/COFINS taxes 2015, 2016 and 2017, when changing from the non-cumulative regime to the mixed regime (cumulative and non-cumulative).

The amounts recalculated with the adoption of the mixed regime were claimed in the action for repetition of debt under number 1071470-93.2020.4.01.3400 against the Federal Union (National Treasury).

NOTE 23 - PROVISIONS AND CONTINGENT LIABILITIES

a) Contingent Assets

In accordance with CPC 25 - Provisions, Contingent Liabilities and Contingent Assets, no contingent assets are recognized in the financial statements.

b) Contingent Liabilities - Probable

Amounts expressed in thousands of Reais, except where indicated.

A provision for contingent liabilities is recognized in the financial statements when, based on the assessment of legal advisors and management, there is a probable outflow of resources to settle the obligations and when the amounts involved can be measured with sufficient certainty, being quantified when the court summons is served and reviewed on a monthly basis.

For the purposes of making provisions for contingent liabilities, BBTS uses a massive and statistical method of probability and estimated forecast, known as "expected value" (which includes lawsuits with a probability of success equal to remote, possible or probable), in accordance with CPC 25, item 39.

Civil suits

The provisioned civil lawsuits consist : i) administrative improbity suits, filed on the grounds of illegalities in the formalization and/or execution of administrative contracts; and ii) suits filed by former suppliers in which the interpretation of contractual clauses is disputed, as well as differences in the amounts agreed upon/paid.

Labor Lawsuits

BBTS is responding to labor lawsuits filed, for the most part, by former employees of service providers (outsourced), who are claiming that the company is subsidiarily liable for the payment of labor sums defaulted on by the employer. There are also labor lawsuits filed by BBTS employees, both active employees and those who have left the company, the most common of which are claims for career progression, hazard pay and others.

Tax actions

BBTS is subject to questioning about taxes and tax conduct related to its position as a taxpayer or tax liable party, in inspection procedures that may give rise to assessments. Most of the assessments relate to the calculation of taxes, such as: ISSQN, ICMS, PIS/CONFINS, IRPJ, IRRF, CSRF. When necessary, judicial deposits are made to guarantee the tax credit in dispute.

The movement in provisions for civil, labor and tax claims, classified as probable, was as follows:

Description	31.03.2024		31.12.2023	
	Current	Non-current	Current	Non-current
Labor claims				
Opening Balance	9.594	31.972	51.368	20.783
Reclassification	-	-	(360)	360
Constitution	766	1.915	6.613	13.295
Reversal Provision	-	(5.648)	(13.621)	(1.647)
Low deposit (withdrawal)	-	-	(6.037)	(3.937)
Payment write-off	(942)	-	(29.300)	-
Monetary Update	274	778	931	3.118
Closing Balance	9.692	29.017	9.594	31.972
Tax demands				
Opening Balance	81	250	-	282
Reclassification	-	-	81	(81)
Reversal of Provision	-	(170)	-	(12)
Monetary Update	-	6	-	61
Closing balance	81	86	81	250
Civil claims				
Opening Balance	949	1.047	1.694	1.149
Reclassification	-	-	206	(206)
Constitution	79	-	-	26
Reversal of Provision	(14)	(184)	(20)	-
Low deposit (withdrawal)	-	-	(1.011)	-
Payment write-off	(72)	-	(2)	-
Monetary Update	16	15	82	78

Amounts expressed in thousands of Reais, except where indicated.

Closing Balance	958	878	949	1.047
Total Labor, Tax and Civil Claims	10.731	29.981	10.624	33.269

Expected Disbursement Schedule:

	Civil	Labor	Tax
From 0 to 1 year	958	9.692	81
Over 1 year to 5 years	878	29.017	86
Total	1.836	38.709	167

The unpredictable nature of the duration of cases, as well as the possibility of changes in court jurisprudence and, eventually, in the legislation itself, make the amounts and the expected timetable for withdrawal uncertain.

c) Contingent Liabilities - Possible

Individually measured contingent liabilities classified as possible losses are not recognized in the interim financial statements, but are disclosed in the notes to the financial statements, as described below, and those classified as remote do not require a provision or disclosure.

Description	31.03.2024	31.12.2023
Labor Claims ^[1]	15.619	17.241
Tax demands ^[2]	41.585	37.554
Civil Claims ^[3]	17.634	17.527
Total	74.838	72.322

The main contingencies arise : ^[1] payment commissions, hazard pay, equalization, wage differences and compensation for collective moral damage; ^[2] DCTF debts; ^[3] administrative misconduct, termination of contracts with suppliers and reimbursement to the public purse.

NOTE 24 - OTHER LIABILITIES

Description	31.03.2024		31.12.2023

Creditors Miscellaneous Displacements	42	-	420	-
Total	5.396	660	4.889	750

NOTE 25 - SHAREHOLDERS' EQUITY

Share capital: the subscribed and paid-up share capital is R\$300,039,531.17 (three hundred million, thirty-nine thousand, five hundred and thirty-one reais and seventeen cents), divided into 497,173,172, of which 248,586,586 are ordinary shares and 248,586,586 are preferred shares. *Banco do Brasil S.A.* holds 99.97% of the company's total shares.

	Preference shares (N)	Percentage (%)	Ordinary Shares (ON)	Percentage (%)
Bank of Brazil	248.586.126	100,00%	248.458.167	99,95%
Others	460	0,00%	128.419	0,05%
Total	248.586.586	100%	248.586.586	100%

Profit reserve:

Legal Reserve: is constituted by the allocation of 5% of the net profit for the year, subject to a limit of 20% of the paid-up share capital or 30% of the share capital plus capital reserves.

Reserve for Expansion: this is set up to be used for future investments. The retention is based on a capital budget drawn up by management and approved by the Board of Directors.

Description	31.03.2024	31.12.2023
Legal reserve	11.704	11.704
Reserve for Expansion	85.379	166.784

Amounts expressed in thousands of Reais, except where indicated.

Treasury shares: BBTS has 62,460 shares acquired from minority shareholders on October 25, 2011 for R\$15 thousand.

Dividends: BBTS has a Dividend Policy, available on the Company's website, approved by the Board of Directors and reviewed at least every three years or when requested by *Banco do Brasil S.A.*, the controlling shareholder.

The variation is due to the monthly updating of dividends by the Selic rate.

	Movements in 2024		
	31.12.2023	Monetary Update	31.03.2024
Dividends	21.750	571	22.321

In December 2023, R\$21.7 thousand was provisioned for dividends for the 2023 financial year, which will be paid after approval at the AGM in April 2024. The remaining balance of dividends, R\$4,000, is related to amounts pending payment, referring to the distribution of dividends from previous years, made available to holders (shareholders), who have not yet taken advantage of their rights. These amounts will be available for 3 years, in accordance with Law 6.404/76, after which the right will lapse.

NOTE 26 - NET OPERATING REVENUE

The company's revenue was generated mainly by medium and long-term contracts for technical assistance, electronic security and monitoring, *contact center*, short message management and software licensing services. Deductions correspond to federal, state and municipal taxes levied on gross revenue and cancellations of services.

Below is a table showing gross and net revenue:

Description	1st Quarter/24	1st Quarter/23
Gross Revenue	469.343	384.767
Technical assistance	186.417	161.637

These transactions are carried out at market price in accordance with Technical Pronouncement CPC 05 (R1)

- Disclosure of Related Parties.

NOTE 32 - FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

BBTS operates with financial instruments. These instruments are managed using operational strategies and internal controls to ensure liquidity, profitability and security. The company does not invest in any other risky assets.

The Company is exposed to the following risks arising from the use of financial instruments: Credit Risk, Liquidity Risk and Market Risk.

The topics below present information on the Company's exposure to each of the aforementioned risks, the Company's objectives, policies and processes for measuring and managing risk, and capital management. Additional quantitative disclosures have been included throughout these interim financial statements.

a) Risk Management Structure

Management has overall responsibility for establishing and supervising the Company's risk management structure, and is also responsible for developing and monitoring these policies.

Amounts expressed in thousands of Reais, except where indicated.

Risk management policies have been established to identify and analyze the risks to which the Company is exposed, to define appropriate risk limits and controls, and to monitor risks and adherence to the limits imposed. Risk policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. Through training and management procedures, BBTS seeks to develop an environment of discipline and control in which all employees are aware of their duties and obligations.

b) Credit risk

Credit risk is the risk of the Company incurring losses from a customer or counterparty in a financial instrument, due to their failure to fulfill their contractual obligations, basically arising from the Company's receivables from customers and other financial instruments, as shown below.

The company basically concentrates its operations with its controlling shareholder, Banco do Brasil S.A., carrying out complementary activities to the financial institution's core business (middle business), which is responsible for approximately 98% of its service revenue. As such, the current credit risk is substantially linked to this client.

Exposure to Credit Risks: the book value of financial assets, R\$334.6 million, represents the maximum credit exposure.

Accounts receivable from customers and other receivables: the Company's exposure to credit risk is mainly influenced by the individual characteristics of customers. However, Management considers the customer management system in its assessment, including the non-payment risk of the sector in which it operates, since these factors can have an impact on credit risk. Considering that 98% of the Company's receivables are concentrated in one client, which is its related party, whose financial instruments are contractual and short term, as well as having no history of losses, the Company's Management considers the risk to be manageable and not material.

c) Interest Rate Risk

This risk arises from the possibility of the company incurring losses due to fluctuations in interest rates or other indexes of financial assets and liabilities, such as price indexes that impact financial expenses related to loans and financing or income from financial investments.

The company mitigates this risk by investing its surplus cash in extra-market investment funds with daily liquidity, in accordance with CMN Resolution 4.986/22.

c.1) Sensitivity Analysis

Sensitivity analyses were determined based on exposure to instrument interest rates through hypothetical stress scenarios of the main market risk factors impacting each of the positions, with all other variables remaining constant.

Probable Scenario: Charges or income were projected for the following year, taking into account the balances and interest rates in force at the end of the period.

Possible Scenario: This projection has been increased by +/- 25% compared to the probable scenario.

Remote Scenario: This projection has been increased by +/- 50% compared to the probable scenario.

Result of the Sensitivity Analysis:

Appreciation Risk

Depreciation risk

Amounts expressed in thousands of Reais, except where indicated.

	Position in 31.03.2024	Scenario Likely	Possible Scenario 25%	Remote Scenario 50%	Possible Scenario -25%	Remote Scenario -50%

^[1] Balance of financial investments in investment funds managed by *Banco do Brasil S.A.* and Caixa Econômica Federal, the rate for the probable scenario was obtained from the average gross yield of both funds for the period.

^[2] Long-term loan balance, obtained from *Banco do Brasil S.A.*, with a contractual financial charge of CDI+ 2.10% p.a.

d) Derivatives

Derivative financial instruments are valued at market value at the time of the monthly trial balances and balance sheets. Valuations or devaluations are recorded in the income or expense accounts of the respective financial instruments.

The methodology for marking derivative financial instruments to market was established on the basis of consistent and verifiable criteria that take into account, in this case, the price according to the closing PTAX on the last working day of the month, with the variation of the currency against the agreed instrument being recognized.

BBTS had two Real for Dollar forward transactions without physical delivery between the parties (*NDF*), both of which closed in June 2023, with a total base value of USD 5,943,973.15 (R\$ 32,905,240.96) and a forward rate of R\$ 5.5359.

The derivative financial instruments described were used to offset, in whole or in part, the risks arising from exposure to changes in the market value of the cash flow of financial assets or liabilities, commitments or expected future transactions and are considered *hedging* instruments.

e) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulties in meeting the obligations associated with its financial liabilities which are settled cash payments or another financial asset. The Company's approach to liquidity management is to ensure, as far as possible, that it always has sufficient liquidity to meet its obligations when they fall due, under normal and stressed conditions, without causing unacceptable losses or risking damaging the Company's reputation.

In April 2021, BBTS obtained a long-term loan from *Banco do Brasil S.A.* in the total amount of R\$148.7 million, which has a financial charge of CDI + 2.10% p.a. with monthly interest and semi-annual amortization. This operation matures in March 2026 and long-term projections of the Average Selic Rate (TMS) are monitored monthly in conjunction with the Central Bank's expectations and projections reports for the purposes of monitoring and projecting expenditure on financial expenses and their impact on the cash balance and payment capacity. This projection and the Liquidity Risk are reported monthly to management and monitored quarterly by the Internal Risks and Controls Committee - Coris.

Salary scale:

	Accounting balance 31.03.2024	Less than a year	One to three years	Total
Loans	104.407	15.307	89.100	104.407
Suppliers ^[1]	56.348	56.348	-	56.348
Consortium	4.122	1.546	2.576	4.122

Amounts expressed in thousands of Reais, except where indicated.

^[1] The "Suppliers" category documents invoices or bills generated by the purchase of goods and services in the course of BBTS's regular activities, with the exception of lease records.

f) Market Risk

Market risk is the risk that changes in market prices, such as interest rates, have on the Company's earnings or on the value of its holdings in financial instruments. The aim of market risk management is to manage and control exposure to market risks within acceptable parameters, while at the same time improving returns.

The company's management actively monitors market fluctuations as a way of protecting itself against market risks.

The company suffers gains or losses from fluctuations in interest rates on its financial assets and liabilities. In this sense, market risks are related to interest rates on short-term investments, since the company has low financial indebtedness. In order to mitigate this type of risk, the company seeks to make its financial investments in off-market funds with post-fixed rates and low volatility.

g) Exchange Rate Risk

This corresponds to the possibility of loss of value due to exchange rate variations. BBTS's exposure to exchange rate risk is due to future resale contracts with customers, whose product costs vary according to the foreign currency. On December 31, 2022, BBTS had 2 resale contracts in force and with a price signed with the client for the year 2023. For these contracts, a currency *hedge* was contracted with maturity in June 2023, ensuring that the exchange rate variation over the term of the contracts would have no impact on the business margin or exposure to exchange rate risk.

h) Financial Instruments - Fair Value

Financial instruments recorded in equity accounts:

	31.03.2024		31.12.2023		Unrealized gain/(loss) without tax effects			
	Value	Value	Value	Value	In the Result		In Shareholders' Equity	
	Accounting	Fair	Accounting	Fair	31.03.2024	31.12.2023	31.03.2024	31.12.2023
Assets

Loans ^[2]	104.407	102.753	111.914	110.025	(1.654)	(1.889)	-	-
Unrealized gain/(loss) (a) without tax effects					(1.654)	(1.889)	-	-

^[1] are classified as level 1 information in the fair value hierarchy.

^[2] are classified as level 3 information in the fair value hierarchy.

Determining the Fair Value of Financial Instruments

Loans: the operation contracted with *Banco do Brasil* has a post-fixed rate with an additional fixed rate p.a., therefore, in order to calculate the fair value, it was valued at the contract rate, with its future cash flows (amortization and interest) discounted at market rates (CDI + 2.45% p.a.) in force on the balance sheet date.

Obligation with Financial Instruments: the foreign exchange hedging instrument contracted is recorded at fair/market value due to the characteristics of the product with the financial institution. The calculation of the market value is estimated according to the difference to be paid or received in the appropriate asset or liability account, obtained according to the difference observed between the Ptax on the last trading day of the year and the fixed exchange rate.

Amounts expressed in thousands of Reais, except where indicated.

Other financial instruments: whether the balance sheet or not, the fair value is approximately equivalent to the corresponding book value.

Value of Financial Assets Measured at Fair Value, by Hierarchy Level

According to the levels of information in the measurement at fair value, the valuation techniques used by BBTS are as follows:

Level 1 - quoted prices in active markets are used for identical financial instruments. A financial instrument is considered to be quoted in an active market if the quoted prices are readily and regularly available, and if these prices represent actual and regularly occurring market transactions on an arm's length basis.

Level 2 - other available information is used, except for Level 1, where prices are quoted in markets that are not active or for similar assets and liabilities, or other information that is available or can be corroborated by information observed in the market is used to support the valuation of assets and liabilities.

Level 3 - information is used in the definition of fair value that is not available in the market. If the market for a financial instrument is not active, BBTS establishes fair value using a valuation technique that considers internal data, but is consistent with accepted economic methodologies for pricing financial instruments.

NOTE 33 - INSURANCE

The insurance taken out follows the company's policy regarding the coverage of its own assets and those of third parties rented by the company in accordance with risk analysis and the economic-financial aspect. The company's main insurance coverages are associated with inventory and building risks.

Below is a table with information on the renewal of insurance policies:

Risks Covered	Premium amount	Risks Covered
Business Comprehensive	103	148.034
General Liability	54	1.125
Total	157	149.159

Report on the review of the interim financial statements

To the Directors, Management and Shareholders of

BB Tecnologia e Serviços S.A. - BBTS

Brasília - DF

Introduction

We have reviewed the accompanying interim financial statements of BB Tecnologia e Serviços S.A. ("BBTS" or the "Company") as of March 31, 2024, which comprise the balance sheet as March 31, 2024, and the related statements of income and comprehensive income, changes in shareholders' equity and cash flows for the three-month period then ended, and notes to the financial statements, including significant accounting policies and other explanatory information.

The Company's management is responsible for the preparation and fair presentation of the interim financial statements in accordance with accounting practices adopted in Brazil, including the requirements of Technical Pronouncement CPC 21 (R1) - Interim Financial Reporting. Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of the review

We conducted our review in accordance with Brazilian and international *review* standards (NBC TR 2410 - Review of *Interim Financial Information Performed by the Independent Auditor of the Entity* and ISRE 2410 - *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*, respectively). A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. The scope of a review is significantly smaller than that of an audit conducted in accordance with Brazilian and international auditing standards and, consequently, does not allow us to obtain assurance that we have become aware of all significant matters that could be identified in an audit. Therefore, we do not express an audit opinion.

Conclusion on the interim financial statements

Based on our review, we are not aware of any facts that lead us to believe that the interim financial statements referred to above do not present fairly, in all material respects, the financial position of the Company as of March 31, 2024, the performance of its operations and its cash flows for the three-month period then ended in accordance with accounting practices adopted Brazil, including the requirements of CPC 21(R1) - Interim Financial Reporting.

Other Matters - Value added statements

The interim financial statements include the statements of value added (DVA), for the three-month period ended March 31, 2024, prepared under the responsibility of the Company's or Company's management, the presentation of which is not required of privately-held companies. These statements have been subjected to review procedures performed in conjunction with the review of the interim financial statements, in order to conclude whether they are reconciled with the interim financial statements and accounting records, as applicable, and whether their form and content are in accordance with the criteria defined in Technical Pronouncement CPC 09 - Statement of Value Added. Based on our review, we are not aware of any facts that lead us to believe that these statements of value added have not been prepared, in all material respects, in accordance with the criteria defined in this standard and in a consistent manner in relation to the interim financial statements, taken as a whole.

Corresponding values

The corresponding figures for the balance sheet as of December 31, 2023 were previously audited by other independent auditors who issued an unmodified report dated March 28, 2024 and for the statements of income, comprehensive income, changes in shareholders' equity and cash flows for the three-month period ended March 31, 2023 were previously reviewed by other independent auditors who issued an unmodified report dated June 30, 2023. The corresponding figures for the statements of value added (DVA) for the three-month period ended March 31, 2023 were subjected to the same review procedures by those independent auditors and, based on their review, those auditors issued a report stating that they were not aware of any facts that led them to believe that the DVA was not prepared, in all material respects, in accordance with the interim financial statements.
